FOR THE LOVE OF SEWING

THE HISTORY OF THE BABY LOCK SERGER

An employee in a Japanese factory saw his friend hemming trousers by hand and realized he could invent a better, easier and more efficient solution. He began developing a smaller, more convenient overlock serger, – a “baby lock.” It worked, and it worked well -- ultimately revolutionizing the way garments are made.

A St. Louis based, family-owned company saw the benefit of this new machine and brought it to the United States. This new home serger was the first Baby Lock. It gave home sewers the opportunity to finish garments like a professional manufacturer.

Over the years, Baby Lock has continued to revolutionize sergers. Today, Baby Lock has 15 patents to its name. Modern Baby Lock sergers have numerous innovative features, making them easy to use for all sorts of projects. RevolutionAir™ Threading, for instance, lets you thread your loopers and needles each with the touch of a button. And thanks to the patented Automatic Thread Delivery System™, no tension knobs are needed. A balanced stitch is delivered on any fabric with any type of thread.

Impressive features aren't the only things you'll get with Baby Lock. The Baby Lock Retailer Network is dedicated to sewing enthusiasts like you. With unsurpassed features and support, there truly is no substitute for a Baby Lock serger.
